A Dynamic Education
Graduate Medical Education
at Temple University Hospital

Temple University Health System neither provides nor controls the provision of health care. All health care is provided by its member organizations or independent health care providers affiliated with TUHS. Each TUHS member organization is owned and operated pursuant to its governing documents.

3401 North Broad Street

For over 100 years, Temple University Hospital has been a major teaching center for Temple University School of Medicine. A totally modern facility, Temple employs the latest technological and medical advancements on its attractive 26-acre Health Sciences campus. Today, it serves as both a tertiary referral center and a primary health provider, treating more than 150,000 outpatients and admitting over 30,000 patients each year.

Temple University Hospital is part of the Temple University Health System — a growing major network of doctors, hospitals, and other health care providers. Our future is more promising than ever as we continue to expand our system into new communities. System member hospitals are located in diverse communities throughout Philadelphia, treat a wide variety of patients, and continually refer patients to Temple University Hospital. Exposure to this diverse pool of patients enhances your knowledge and experience as well as your personal and professional development. Your Temple training can also be advanced at our other sites, depending upon your program and its specific requirements. Over and over, our house staff tell us that the more they learn about Temple’s programs, the more attractive a Temple education becomes.

As Temple house staff, you will gain valuable “hands-on” experience early in your career. You will enjoy surroundings that are congenial and totally supportive. You will work side by side with faculty and senior residents alike, all of whom are ready and willing to help you develop your talents to their fullest.

Temple. A Dynamic Place To Learn.

Some of the ways Temple provides a unique graduate education experience:

• A superb reputation for faculty-house staff relationships
• Extraordinary clinical hands-on experience for house staff
• Level I Regional Trauma Center in a high-volume Emergency Department
• Nationally recognized NIH & NCI-funded research
• Clinical research center (CRC)
• Temple University Children’s Medical Center — the region’s newest pediatric medical center
• A fully integrated health system positioned for continued growth

Pioneering clinical programs:
• A nationally-recognized heart transplantation center
• Gamma Knife®
• Stereotactic radiosurgery
• Philadelphia’s largest sports medicine program
• The nation’s largest thrombosis center
• Bone marrow, kidney, heart and lung transplant programs

“...the teaching is very clinical and hands-on. You learn by seeing and doing and in that respect no one can hold a candle to Temple.”

Paul Newman, M.D.
General & Trauma Surgery
**Temple’s Team Approach**

We believe that you learn best by working closely with both patients and faculty. And **we are the perfect size** to practice what we preach and provide you with an education that will form the backbone of your professional career.

We are large enough to give you the widest possible range of educational experiences. Yet we are small enough to give you the personal supervision and guidance you may need.

Our growth as a health system expands your opportunity for learning by ensuring that you see a **limitless variety of patients** from various backgrounds.

We encourage this participation as part of our practice of **open communication** among faculty, staff physicians and residents. All of which adds immeasurably to your store of knowledge. From the day you join us, you will be an **integral part of our team** — and function at a high level of professional competency.

---

**Programs to Meet Your Goals**

You will find a wealth of experience when you join our residency and fellowship training programs. Temple’s outstanding basic and applied research programs encompass virtually all areas of the basic and clinical sciences. You can work with leading investigators in any of the basic science or clinical departments, the highly respected Fels Institute for Cancer Research or the distinguished Sol Sherry Thrombosis Research Center.

**Surgery**

- Cardio-Thoracic Surgery
- Vascular Surgery
Temple is situated in a large urban environment that combines big city energy and small town simplicity. Philadelphia is a city where 200-year-old neighborhoods juxtapose against a modern skyline. A city where you may walk down cobblestone streets, browse delightful shops, dine in a variety of wonderful restaurants and enjoy theater – all within minutes of each other.

Philadelphia also encourages outdoor adventure. Weekends often find residents biking, rollerblading or running along the banks of the Schuylkill River or hiking one of the hundreds of lush, winding paths in Fairmount Park, the nation’s largest inner-city park. Just a short drive from Philadelphia, you’ll find the peaceful serenity of a rolling countryside or the thrill of downhill skiing.

Philadelphia is considered one of the most affordable housing markets in the country with a variety of housing options close to the Temple campus. Comfortable high-rise and garden apartments, as well as quaint townhomes, provide security and peace of mind – and fit comfortably into your budget.

Situated on Philadelphia’s major North-South thoroughfare, Temple can be easily reached by car or by using the region’s expansive mass transit system which covers both city and suburbs.

“Philly has all the excitement and style of a big city plus it’s totally accessible and more affordable than most.”

Eric Pifer, M.D.
Assistant Professor of Medicine

Philadelphia. A Dynamic Place To Live.
